

Protein Isoform/Enzyme Isozyme/Activity Staining/Silver Staining Services

Homebound Enterprises and SEP offer our highly technical services for protein extraction from any biological samples, utilizing non-denaturing protein electrophoresis for protein separation and activity staining of enzymes.

Our comprehensive approach enables researchers and scientists to unlock valuable insights into protein composition and enzymatic activity.

At Homebound and SEP, we specialize in offering advanced services to assist researchers in studying proteins and enzyme isozymes.

Our Services:

1. **Protein Extraction:** We provide technical support expert for protein extraction from diverse biological samples, including cells, tissues, blood, and plant materials. Our staff guides you to state-of-the-art techniques and protocols to ensure optimal protein yield and quality, enabling researchers to obtain reliable and reproducible results.
2. **Non-Denaturing Protein Electrophoresis:** We offer support to utilize non-denaturing protein electrophoresis techniques, such as native-PAGE, for protein separation.
3. **Activity Staining of Enzymes:** Our technical service includes activity staining of enzymes, utilizing specific substrates and staining techniques to visualize and quantify enzyme activity.

Why Choose Us:

- **Expertise:** Our staff is highly skilled professionals with extensive experience in protein extraction, non-denaturing electrophoresis, and enzyme activity staining. We ensure precise and accurate results to meet the unique requirements of your research.
- **Customized Approach:** We understand that each research project is unique. Therefore, we offer tailored solutions to meet your specific experimental goals and requirements. Our staff works closely with you to design an approach that best suits your needs.
- **Timely Delivery:** We prioritize efficiency and understand the importance of meeting deadlines. We strive to deliver results within the agreed-upon timeframe without compromising the quality of our services.

Collaborate with us and unlock the potential of enzyme isoform research. Our expertise in protein extraction, non-denaturing electrophoresis, and enzyme activity staining will provide you with valuable data to advance your scientific investigations.

Contact us today to discuss your project requirements and obtain a customized quote.
